The Framework aims to:

- Recognize growth and progress (rather than just results)
- Identify strengths (rather than only deficits)
- Center aspirations (rather than descriptions of the current state)

While also:

- Accounting for differences in community maturity & mission
- Deterring attempts at "values-washing"

In summer 2022, NGLP ran a pilot with seven communities, who evaluated themselves against the Transparency value and its four associated principles.

Applying a framework for values-driven publishing

Reflective Practice
How does our pricing model reflect our community’s values?
