Building bridges between Open Science and disciplinary realities in the Arts and Humanities

Erzsébet Tóth-Czifra
Open Science Officer at DARIAH-EU
@etothczifra
Why Open Science really matters to me...

Opening up access to scholarly knowledge is a key value of the academy in the 21st century.

Still, sometimes we still need to cross actual, physical borders to cross virtual ones (paywall) or access to undigitized cultural heritage materials.

Luckily, things are changing...
Epistemic cultures matter!

@DARIAHeu
How does DARIAH contribute to the transition towards Open Access in the humanities?

• Pathways to Open Access that are meaningful and relevant for humanists (see e.g. the DARIAH Open blog and our OS/OA helpdesk service )
• A voice of humanities in EU policy debates
• Open Access book bursary for Early Career Researchers
• Repositories for humanities scholars and connecting them to global information management systems
• Experiments with novel publication and evaluation practices (e.g the OpenMethods platform, Episciences )
• Putting Digital Humanities tools in the service of scholarly communication (e.g. the NERD entity recognition tool)
• Collaboration with OPERAS to build an open infrastructure for SSH scholarly communication
Ready, set, explore, reuse!

Training materials on DARIAH Campus (contains Open Science!)
