Ambitions of the European Commission

What have we done so far?

- Available to H2020, HE, Euratom, COST Actions, MSC Actions, and European Research Council, beneficiaries.
- Immediate publication and fully open access.
- Post-publication open peer review.
- No author-facing fees - all APCs paid centrally by the EC.
- Underpinned by open data with Data Availability Statements and deposition of underlying data (CC0) in approved repositories.
- Articles published with CC-BY, copyright retained by authors.
- Article versioning to support publishing updated results and findings.
- Long-term vision to set up a pan-European platform, with first steps from 2026.

Next steps...

- Increase indexation in relevant venues.
- Expansion of authorship eligibility criteria to other EC-funded researchers.
- Multilingual article metadata (including the abstract) in an additional language from English: French, German, Italian, and Spanish.
- Implementing OAI-PMH: Open Archives Initiative Protocol for Metadata Harvesting to increase interoperability.
- Creating a sustainable and scalable strategy for the platform to support the long-term vision of a pan-European platform.

Open Research Europe

A publishing partnership for the European Commission
